**E.** Implementieren Sie Einnahme-Sampling mit dem Application Insights SDK.
**Answer: D**
Explanation:
Explanation
Sampling is an effective way to reduce charges and stay within your monthly quota.
You can set sampling manually, either in the portal on the Usage and estimated costs page; or in the ASP.NET
SDK in the .config file; or in the Java SDK in the ApplicationInsights.xml file, to also reduce the network traffic.
Adaptive sampling is the default for the ASP.NET SDK. Adaptive sampling automatically adjusts to the
volume of telemetry that your app sends. It operates automatically in the SDK in your web app so that
telemetry traffic on the network is reduced.
