By compiling our CKAD prepare torrents with meticulous attitude, the accuracy and proficiency of them is nearly perfect, We strongly believe that you will understand why our CKAD latest training guide can be in vogue in the informational market for so many years.

Then you can free download the demos of our CKAD study guide, and you can have a experience on them before you pay for them, The randomize feature is helpful in selecting the exam questions according to your potential.

We are applying new technology to perfect the CKAD study materials, You can finish buying our CKAD exam torrent in less than one minute, Normally we can make sure our CKAD exam dumps contain 75%-80% exam questions & answers of the Linux Foundation Certified Kubernetes Application Developer Exam real test.

You can try it later and then decide to take it or leave.

NEW QUESTION: 1

Which of the following can be best defined as computing techniques for inseparably embedding unobtrusive marks or labels as bits in digital data and for detecting or extracting the marks later?

- A. Digital signature
- B. Digital watermarking
- C. Digital enveloping
- D. Steganography

Answer: B

Explanation:

RFC 2828 (Internet Security Glossary) defines digital watermarking as computing techniques for inseparably embedding unobtrusive marks or labels as bits in digital data-text, graphics, images, video, or audio#and for detecting or

extracting the marks later. The set of embedded bits (the digital watermark) is sometimes hidden, usually imperceptible, and always intended to be unobtrusive. It is used as a measure to protect intellectual property rights. Steganography involves hiding the very existence of a message. A digital signature is a value computed with a cryptographic algorithm and appended to a data object in such a way that any recipient of the data can use the signature to verify the data's origin and integrity. A digital envelope is a combination of encrypted data and its encryption key in an encrypted form that has been prepared for use of the recipient.
