uthentication-failed- because-client-reject-certificate
The error you are seeing in ISE is pointing to your client, if
you have the eap settings set to
"validate server certificate" then you must manually set it to
trust the rootCA that signed the
ISE certificate, or you can disable this option for testing.
You can try to remove this wireless network profile, and
recreate it and see if the pop up appears which asks you to
validate the server's identity.
Possible Causes
