NEW QUESTION: 4
Note: This question is part of a scries of questions that
present the same scenario. Each question In the series contains
a unique solution that might meet the stated goals. Some
question sets might have more than one correct solution, while
others might not have a correct solution.
After you answer a question In this section, you will NOT be
able to return to It. As a result, these questions will not
appear In the review screen.
Your network contains an Active Directory domain named
contoso.com. The domain contains mulbple Hyper-V hosts.
You need to deploy several critical line-of-business
applications to the network; to meet the following
requirements:
*The resources of the applications must be isolated from the
physical host.
*Each application must be prevented from accessing the
resources of the other applications.
*The configurations of the applications must be accessible only
from the operating system that hosts the application.
Solution: You deploy a separate Windows container for each
application.

Does this meet the goal?
A. No
B. Yes
Answer: B
