Answer: C

NEW QUESTION: 4

A user has set an IAM policy where it allows all requests if a request from IP 10.10.10.1/32.

Another policy allows all the requests between 5 PM to 7 PM.

What will happen when a user is requesting access from IP 10.10.10.1/32 at 6 PM?

A. It will allow access

B. IAM will throw an error for policy conflict

C. It is not possible to set a policy based on the time or IP

D. It will deny access

Answer: A

Explanation:

With regard to IAM, when a request is made, the AWS service decides whether a given request should be allowed or denied.

The evaluation logic follows these rules:

By default, all requests are denied. (In general, requests made using the account credentials for resources in the account are always allowed.) An explicit allow policy overrides this default.

An explicit deny policy overrides any allows.

http://docs.aws.amazon.com/IAM/latest/UserGuide/AccessPolicyLanguage_EvaluationLogic.html
