E.
Glacierを使用してセッションストレットを保存します。

Answer: B

NEW QUESTION: 4

A. Option B
B. Option A
C. Option C
D. Option D
Answer: B
Explanation:
When the user gets an 'Insufficient Instance Capacity' error while launching or starting an EC2 instance, it
means that AWS does not currently have enough available capacity to service the user request. If the
user is requesting a large number of instances, there might not be enough server capacity to host them.
The user can either try again later, by specifying a smaller number of instances or changing the
availability zone if launching a fresh instance.
