It is helpful for clearing up your nervousness before test, The candidates study **H12-831_V1.0-ENU Latest Study Guide** with the actual material that they see in the exam and because of that it clears up their concepts and they know the answers to all the questions already.

Although Huawei certification H12-831_V1.0-ENU exam is difficult, through doing Condocubeapp's exercises you will be very confident for the exam, Once there are latest versions released, we will send the updated H12-831_V1.0-ENU dumps pdf to your email immediately.

NEW QUESTION: 1
Which BGP feature allows BGP routing tables to be refreshed without impacting established BGP sessions?
A. soft reconfiguration
B. hard reset
C. BGP synchronization
D. confederations
Answer: A

NEW QUESTION: 2
Your company has three offices. The offices are located in New
York, London and Sydney. The offices connect to each other by
using a WAN link. Each office connects directly to the
Internet.
The company has an Exchange Server organization. The
organization contains six mailbox servers. The servers are
configured as shown in the following table.

Each office is configured to use a different Send connector to
send email messages to the Internet.
You need to ensure that the servers route email messages that
have Internet recipients through their respective site only.
What should you modify?
A. the cost of each Send connector
B. the permissions of each Send connector
C. the scope of each Send connector
D. the settings of the site links
Answer: C

NEW QUESTION: 3
Case Study 2 - Contoso Ltd
Overview
Contoso, Ltd, is a consulting company that has a main office in
Montreal and two branch offices in Seattle and New York.
Contoso has the users and computers shown in the following
table.

The company has IT, human resources (HR), legal (LEG),
marketing (MKG) and finance (FIN) departments.
Contoso uses Microsoft Store for Business and recently
purchased a Microsoft 365 subscription.
The company is opening a new branch office in Phoenix. Most of
the users in the Phoenix office will work from home.
Existing Environment
The network contains an Active Directory domain named
contoso.com that is synced to Microsoft Azure Active Directory
(Azure AD).
All member servers run Windows Server 2016. All laptops and
desktop computers run Windows
10 Enterprise.
The computers are managed by using Microsoft System Center
Configuration Manager. The mobile devices are managed by using
Microsoft Intune.
The naming convention for the computers is the department
acronym, followed by a hyphen, and then four numbers, for
example, FIN-6785. All the computers are joined to the

on-premises Active Directory domain.
Each department has an organization unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.
Intune Configuration

Requirements
Planned Changes
Contoso plans to implement the following changes:
- Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- Start using a free Microsoft Store for Business app named App1.
- mplement co-management for the computers.
Technical Requirements
Contoso must meet the following technical requirements:
- Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- Monitor the computers in the LEG department by using Windows Analytics.
- Create a provisioning package for new computers in the HR department.
- Block iOS devices from sending diagnostic and usage telemetry data.
- Use the principle of least privilege whenever possible.
- Enable the users in the MKG department to use App1.
- Pilot co-management for the IT department.
You need to meet the technical requirements for the IT department.
What should you do first?
A. From the Configuration Manager console, add an Intune subscription.
B. From the Azure Active Directory blade in the Azure portal, enable Seamless single sign-on.
C. From the Microsoft Intune blade in the Azure portal, configure the Windows enrollment settings.
D. From the Azure Active Directory blade in the Azure portal, configure the Mobility (MDM and MAM) settings.
Answer: D
Explanation:

NEW QUESTION: 4
You use WhiteSource Bolt to scan a Node.js application.
The WhiteSource Bolt scan identifies numerous libraries that have invalid licenses. The libraries are used only during

development and are not part of a production deployment.
You need to ensure that WhiteSource Bolt only scans production dependencies.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Modify the devDependencies section of the project's Package.json file.
B. Configure WhiteSource Bolt to scan the node_modules directory only.
C. Modify the WhiteSource Bolt policy and set the action for the licenses used by the development tools to Reassign.
D. Run npm install and specify the --production flag.
Answer: A,D
Explanation:
A: To resolve NPM dependencies, you should first run "npm install" command on the relevant folders before executing the plugin.
C: All npm packages contain a file, usually in the project root, called package.json - this file holds various metadata relevant to the project. This file is used to give information to npm that allows it to identify the project as well as handle the project's dependencies. It can also contain other metadata such as a project description, the version of the project in a particular distribution, license information, even configuration data - all of which can be vital to both npm and to the end users of the package.
