NEW QUESTION: 1
Which of the following is NOT a fundamental component of an alarm in an intrusion detection system?
A. Sensor
B. Enunciator
C. Response
D. Communications
Answer: C
Explanation:
Response is the correct choice. A response would essentially be the action that is taken once an alarm has been produced by an IDS, but is not a fundamental component of the alarm.
The following are incorrect answers:
Communications is the component of an alarm that delivers alerts through a variety of
channels such as email, pagers, instant messages and so on.

An Enunciator is the component of an alarm that uses business logic to compose the
content and format of an alert and determine the recipients of that alert.
A sensor is a fundamental component of IDS alarms. A sensor detects an event and
produces an appropriate notification.
Domain: Access Control

Official guide to the CISSP CBK. page 203.

NEW QUESTION: 2
A user has setup a web application on EC2.
The user is generating a log of the application performance at every second.
There are multiple entries for each second.
If the user wants to send that data to CloudWatch every minute, what should he do?
A. It is not possible to send the custom metric to CloudWatch every minute
B. Give CloudWatch the Min, Max, Sum, and SampleCount of a number of every minute
C. The user should send only the data of the 60th second as CloudWatch will map the receive data timezone with the sent data timezone
D. Calculate the average of one minute and send the data to CloudWatch
Answer: B
Explanation:
Amazon CloudWatch aggregates statistics according to the period length that the user has specified while getting data from CloudWatch. The user can publish as many data points as he wants with the same or similartime stamps. CloudWatch aggregates them by the period length when the user calls get statistics about those data points. CloudWatch records the average (sum of all items divided by the number of items. of the values received for every 1-minute period, as well as the number of samples, maximum value, and minimum value for the same time period.
CloudWatch will aggregate all the data which have time stamps within a one-minute period.

NEW QUESTION: 3
