NEW QUESTION: 3

You have set up the task.max-lwps resource control on your Solaris 11 system.

Which option describes how to configure the system so that syslogd notifies you when the resources control threshold value for the task.max-lwps resource has been exceeded?

- A.** Modify the /etc/syslog.conf file to activate system logging of all violations of task.max-lwps and then refresh then svc: /system/system-log:default service.
- B.** Use the prctl command to set the logging of all resource control violations at the time the task.max-lwps resource control is being setup.
- C.** Use the setrctl command to set the logging of all resource control violations for the task.max-lwps resource control.
- D.** Use the rctladm command to enable the global action on the task.max-lwpa resource control.
- E.** Activate system logging of all violations of task.max-lwpp in the /etc/rctldm.conf file and then execute the rctladm-u command.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

rctladm - display and/or modify global state of system resource controls

The following command activates system logging of all violations of task.max-lwps.

```
# rctladm -e syslog task.max-lwps
#
```

NEW QUESTION: 4

When configuring a status used in a step, it is possible to ask the system to automatically change the status. Under what two circumstances can this functionality be enabled?

- A.** This functionality can be enabled for a screening service such as an assessment that can progress the candidate to a new status based on the results.
- B.** This functionality can be enabled for the interview step once an interview is scheduled.
- C.** This functionality can be enabled in the offer step in the event that a candidate rescinds his or her offer.
- D.** This functionality can be enabled for the review step once a hiring manager has completed his or her scheduled review.

Answer: A,B
