Your work as a Sales Administrator in the ABC.com Sales office includes the production of workbooks using Microsoft Office Excel 2010.

You are working on a Sales report for the last quarter. You insert a table into a worksheet and populate the table with the names of the Sales people and their total sales over the last three months.

Which of the following Excel functions can you NOT do if your workbook contains a table?

- A. You will be unable to encrypt the workbook.
- B. You will be unable to share the workbook.
- C. You will be unable to run the Document Inspector.
- D. You will be unable to mark the workbook as final.

**Answer: B**

**NEW QUESTION: 3**

An information security program should focus on:

- A. continued process improvement.
- B. best practices also in place at peer companies.
- C. solutions codified in international standards.
- D. key controls identified in risk assessments.

**Answer: D**

Explanation:

Risk assessment identifies the appropriate controls to mitigate identified business risks that the program should implement to protect the business. Peer industry best practices, international standards and continued process improvement can be used to support the program, but these cannot be blindly implemented without the consideration of business risk.
