Apply for the PEGAPCBA86V1 Exam right away so you can get certified by using our Pegasystems Dumps, Practice on valid PEGAPCBA86V1 practice test software and we have provided their answers too for your convenience.

NEW QUESTION: 1

You are required to configure a Coherence cluster for a WebLogic domain. Review the image below for the architecture of the WebLogic domain.

The configuration represents the following:

Two WebLogic clusters of n number of servers each

One cluster contains an EAR deployment that contains a WAR module and a GAR module

One cluster contains a GAR deployment

Application data flows into the cluster with the EAR deployment and then to the cluster with the

standalone GAR deployment

Based on this configuration, what is the typical configuration of a Coherence cluster for this domain?

A. Single Coherence cluster that includes both WebLogic clusters.

EAR and standalone GAR clusters are both storage-enabled.

B. Single Coherence cluster that includes both WebLogic clusters.

EAR cluster is storage-disabled.

GAR cluster is storage-enabled.

C. Single Coherence cluster that includes both WebLogic clusters/

EAR cluster is storage-enabled.

GAR cluster is storage-disabled.

D. A Coherence cluster for each WebLogic cluster.

EAR and GAR clusters use a replicated topology with storage enabled.

Answer: B

Explanation:

Explanation/Reference:

A Coherence cluster can contain any number of managed Coherence servers. The servers can be standalone managed servers or can be part of a WebLogic Server cluster that is associated with a Coherence cluster.

* storage-disabled - a managed Coherence server that is not responsible for storing data and is used to host Coherence applications (cache clients). A Coherence application GAR is packaged within an EAR and deployed on storage-disabled managed Coherence servers.

* storage-enabled - a managed Coherence server that is responsible for storing data in the cluster.

Coherence applications are packaged as Grid ARchives (GAR) and deployed on storage-enabled managed Coherence servers.

NEW QUESTION: 2

You are an automation engineer for your company. Your Scrum team is defining processes for how your team should deliver products for product owner approval.

Your development team is deciding what the definition of done should be.

You need to contribute a test suite that will confirm each user story's level of done.

Which test should you perform?

- A. System
- B. Integration
- C. Performance
- D. Security

Answer: A

NEW QUESTION: 3

What is the advantage of making storage checkpoints automatically accessible through a directory named .checkpoint in the root of the file system?

- A. it automatically creates a new storage checkpoint as changes are made to the file system
- B. it ensures the inode number of a file is different across storage checkpoints
- C. it eliminates the need for manually mounting storage checkpoints
- D. it ensures a storage checkpoint is automatically deleted under certain conditions

Answer: C

Explanation:
