NEW QUESTION: 2

You are the program manager for your organization and you need to define all of the program resources you'll need for your program. All of the following can be considered a program resource except for which one?

- A. A positive risk response
- B. Gary, an application developer
- C. A forklift
- D. Materials for the installation of a new server

Answer: A

NEW QUESTION: 3

You need to design a sharding strategy for the Planning Assistance database.

What should you recommend?

- A. a range mapping shard map on the binary representation of the speed column
- B. a list mapping shard map on the binary representation of the License Plate column
- C. a range mapping shard map on the time column
- D. a list mapping shard map on the location column

Answer: B

Explanation:

Explanation

Data used for Planning Assistance must be stored in a sharded Azure SQL Database.

A shard typically contains items that fall within a specified range determined by one or more attributes of the data. These attributes form the shard key (sometimes referred to as the partition key). The shard key should be static. It shouldn't be based on data that might change.
