NEW QUESTION: 3
Your network contains 50 servers that run Windows Server 2003 and 50 servers that run Windows Server 2008.
You plan to implement Windows Server 2012.
You need to create a report that includes the following information:
The servers that run applications and services that can be moved to Windows Server 2012
The servers that have hardware that can run Windows Server 2012
The servers that are suitable to be converted to virtual machines hosted on Hyper-V hosts that run Windows Server 2012
What should you do?
A. From an existing server, run the Microsoft Application

Compatibility Toolkit (ACT).
B. Install Windows Server 2012 on a new server, and then run
Microsoft Deployment Toolkit (MDT) 2012.
C. Install Windows Server 2012 on a new server, and then run
the Windows Server Migration Tools.
D. From an existing server, run the Microsoft Assessment and
Planning (MAP) Toolkit.
Answer: D
Explanation:
The Microsoft Assessment and Planning Toolkit (MAP) is an
agentless, automated, multiproduct planning and
assessment tool for quicker and easier desktop, server and
cloud migrations. MAP provides detailed readiness
assessment reports and executive proposals with extensive
hardware and software information, and actionable
recommendations to help organizations accelerate their IT
infrastructure planning process, and gather more detail on
assets that reside within their current environment. MAP also
provides server utilization data for Hyper-V server
virtualization planning; identifying server placements, and
performing virtualization candidate assessments, including
ROI analysis for server consolidation with Hyper-V.
The latest version of the MAP Toolkit adds new scenarios to
help you plan your IT future while supporting your current
business needs. Included scenarios help you to:
Plan your deployment of Windows 8 and Windows Server 2012 with
hardware and infrastructure readiness
assessments
Assess your environment for Office 2013
Plan your migration to Windows Azure Virtual Machines
Track Lync Enterprise/Plus usage
Size your desktop virtualization needs for both Virtual Desktop
Infrastructure (VDI) and session based virtualization
using Remote Desktop Services
Ready your information platform for the cloud with SQL Server
2012
Virtualize your existing Linux servers onto Hyper-V
Identify opportunities to lower your virtualization costs with
Hyper-V using the VMware migration assessment
MAP is just one of the tools provided by the Microsoft Solution
Accelerators team. The
Microsoft Assessment and Planning Toolkit, Microsoft Deployment
Toolkit, and Security
Compliance Manager provide tested guidance and automated tools
to help organizations plan, securely deploy, and
manage new Microsoft technologies-easier, faster, and at less
cost. All are freely available, and fully-supported by
Microsoft.
