NEW QUESTION: 2
An organization has 10000 employees. The organization wants to
give restricted AWS access to each
employee. How can the organization achieve this?
A. It is not recommended to support 10000 users with IAM
B. Use Identity federation with SSO
C. Use STS and create the users' run time
D. Create an IAM user for each employee and make them a part of
the group
Answer: B
Explanation:
Identity federation enables users from an existing directory to
access resources within your AWS account,
making it easier to manage your users by maintaining their
identities in a single place. In this case, the
federated user is the only solution since AWS does not allow
creating more than 5000 IAM users.
