You totally can afford them, You just need take the spare time to study C\_THR87\_2105 training material, the effects are obvious.

**NEW QUESTION: 1**

Which description of the function of a Cisco APIC is true?

- A. The infrastructure VLAN ID of the ACI fabric is used to communicate between the controller and the VMware vCenter server.
- B. The APIC exposes a northbound API by using XML and JSON.
- C. The APIC discovers only the leaf switch to which it directly connects.
- D. When communication to the APIC is down, the Cisco ACI fabric fails to forward traffic.

**Answer: B**

**NEW QUESTION: 2**

Which feature describes MAC addresses that are dynamically learned or manually configured, stored in the address table, and added to the running configuration?

- A. static
- B. sticky
- C. dynamic
- D. secure

**Answer: B**

Explanation:

With port security, you can configure MAC addresses to be sticky. These can be dynamically learned or manually configured, stored in the address table, and added to the running configuration. If these addresses are saved in the configuration file, the interface does not need to dynamically relearn them when the switch restarts. Although sticky secure addresses can be manually configured, it is not recommended.
