Besides, if you have any trouble in the purchasing C-TS460-2020 practice torrent or trail process, you can contact us immediately and we will provide professional experts to help you online.

Using C-TS460-2020 Exam Questions will enable you to cover up the entire syllabus within as minimum as ten days only, While you may have some concern and worries after purchasing our C-TS460-2020 study guide files, please looked down there are all the points you may concern.

They have rich experience in predicating the C-TS460-2020 exam, It is our privilege and responsibility to render a good service to our honorable customers.

#### **NEW QUESTION: 1**

A custom wants to create a tickets in an external ticketing system when a Rule is triggered, the intention is to use a Custom Action Script to call REST-API of the ticketing system.

How could this be done in IBM Security QRadar SIEM V7.2.7?

- A.** Call the QRadar REST-API endpoint/custom\_actions/scripts/{scripts\_id}
- B.** Monitor the Console's syslog file: /var/log/messages and execute a script when the event appears
- C.** Use a BASH script to run the 'curl' command to execute the required REST-API call in the ca\_jail
- D.** In the Offense Rule Responses, select the "Run Custom Script" option,

**Answer: C**

#### Explanation:

Attach scripts to custom rules to do specific actions in response to network events. Use the Custom Action window to manage custom action scripts.

Use custom actions to select or define the value that is passed to the script and the resulting action.

For the security of your deployment, QRadar does not support the full range of scripting functionality that is provided by the Python, Perl, or Bash languages.

Example of a BASH script with the curl command:

```
# !/bin/bash
console_ip=$1
api_token=$2
offense_source_ip=$3
auth_header="SEC:$api_token"
output=$(curl -k -H $auth_header
https://$console_ip/console/restapi/api/
asset_model/assets?filter=interfaces%20contains%20%28%20ip_addr
esses
%20contains%20%28%20value%20%3D%20%22$offense_source_ip%22%29%2
9)
# Basic print out of the output of the command
echo $output
```
