NEW QUESTION: 2

DRAG DROP

The UploadOrder() method in the UploadCallbackService service is not implementing the callback behavior defined in the IUploadCallBackService interface.

You need to modify the class to implement the required callback behavior.

What should you do? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segments may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Answer :

Explanation:

Explanation/Reference:

Testlet 1

Background

You are developing an online bookstore web application that will be used by your company's customers.

Technical Requirements

General requirements:

The web store application must be an ASP.NET MVC application written in Visual Studio.

The application must connect to a Microsoft SQL database.

TheGetTop100Books()method is mission critical and must return data as quickly as possible. It should

take advantage of fast, forward-only, read-only methods of reading data.

TheImportBooks()method must keep a copy of the data that can be accessed while new books are

being imported without blocking reads.

TheCreateMonthlyTotalsReport()method must lock the data and prevent others from updating or

inserting new rows until complete.

The college textbook area of the web application must get data from a daily updated CSV file.

The children's book area of the web application must get data directly from a local database. It must

use a connection string. It must also support access to the stored procedures on a database. Further, it is required to have strongly typed objects. Finally, it will require access to databases from multiple vendors and needs to support more than one-to-one mapping of database tables.

The cookbook functionality is contained within a client-side application that must connect to the server

using HTTP and requires access to the data using JavaScript. TheBookApiControllerclass must have a method that is able to perform ad-hoc queries using OData.

The RESTful API of the bookstore must expose the following endpoint.

Action: Get a list of all books

HTTP method: GET

Relative URI: /books

Action: Get a book by id

HTTP method: GET

Relative URI: /books/id

Action: Create a new book

HTTP method: POST

Relative URI: /books

Action: Update a book

HTTP method: PUT

Relative URI: /books/id

Action: Delete a book

HTTP method: DELETE

Relative URI: /books/id

NEW QUESTION: 3

Your customer has the following business requirements in the Procurement business area:

Identify the three product offerings of Oracle Procurement Cloud that fulfill the above requirements.

- A. Purchasing
- B. Supplier Qualification
- C. Sourcing
- D. Procurement Contract
- E. Self Service Procurement
- F. Supplier Portal

Answer: B,D,E

Explanation:

B: Oracle Fusion Supplier Qualification Management Cloud Service is a comprehensive qualification management system designed to improve supplier compliance, data accuracy, and visibility.

C: Oracle Self Service Procurement Cloud key features includes catalog superstore.

D: Using the Specify Customer Contract Management Business Function Properties task, available by navigating to Setup and Maintenance work area and searching on the task name, you can specify a wide variety of business function settings for customer contracts in a specific business unit. The selections you make for these business functions impact how Oracle Fusion Enterprise Contracts behaves during contract authoring.
