NEW QUESTION: 1

- A. Option D
- B. Option A
- C. Option B
- D. Option C

Answer: C

NEW QUESTION: 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

Refer to exhibit:

Server1 has two virtual machines named VM1 and VM2 that run Windows Server 2016. VM1 connects to Private and VM2 has two network adapters.

You need to ensure that VM1 connects to the corporate network by using NAT.

Solution: You connect VM2 to private1 and External1. You install the Remote Access Server role on VM2, and you configure NAT in the Routing and Remote Access console. You configure VM1 to use VM2 as the default gateway.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION: 3

Scenario: A company has a network with a central server and several client computers. The server is connected to the Internet. The client computers are connected to the server. The server is configured to allow remote access. The client computers are configured to connect to the server. The server is configured to allow remote access. The client computers are configured to connect to the server.

- A. The server is configured to allow remote access. The client computers are configured to connect to the server.
- B. The server is configured to allow remote access. The client computers are configured to connect to the server.
- C. The server is configured to allow remote access. The client computers are configured to connect to the server.
- D. The server is configured to allow remote access. The client computers are configured to connect to the server.

Answer: C
