**NEW QUESTION: 1**

- A. Option D
- B. Option C
- C. Option A
- D. Option B
- E. Option E

**Answer: C**

**NEW QUESTION: 2**

What are the important points linked to the Packaged Integration for SAP ERP Integration?

There are 2 correct answers to this question. Choose:

- A. ERP orders replicated to sales orders
- B. Real-time integration of transactional data
- C. Real-time integration of work ticket to Services
- D. Sales order created in C4C replicated to ERP

**Answer: B,D**

**NEW QUESTION: 3**

Given the code fragment:

What change should you make to apply good coding practices to this fragment?

- A. Add nested try-with-resources statements for the statement and ResultSet declarations.
- B. Add a finally clause after the catch clause.
- C. Rethrow SQLException.
- D. Add the statement and ResultSet declarations to the try-with-resources statement.

**Answer: B**

Explanation:

The finally block always executes when the try block exits. This ensures that the finally block is executed even if an unexpected exception occurs. But finally is useful for more than just exception handling -- it allows the programmer to avoid having cleanup code accidentally bypassed by a return, continue, or break. Putting cleanup code in a finally block is always a good practice, even when no exceptions are anticipated.

**NEW QUESTION: 4**

A planner recommends a \$5000 equity award. Using the stock value table as shown in the attached screenshot and a 50/50 value award split between stock and options, how many units of each does the employee receive? Please choose the correct answer.
