You will have good command knowledge with the help of our [H19-336 Visual Cert Test](#) study materials, While, if your time is enough for well preparation, you can study and analyze the answers.

Certain vendors might release updated versions of **Reliable HMJ-1217 Test Preparation** the related exam, Large amount of special offer of all Job Management Partner 1 Certified Professional Security Management (V12) latest training material.

NEW QUESTION: 1

Your company uses Azure DevOps for the build pipelines and deployment pipelines of Java based projects. You need to recommend a strategy for managing technical debt. Which two actions should you include in the recommendation? Each correct answer presents part of the solution NOTE: Each correct selection is worth one point.

- A.** Configure post-deployment approvals in the deployment pipeline.
- B.** Integrates Azure DevOps and Azure DevTest Labs.
- C.** Integrate Azure DevOps and SonarQube.
- D.** Configure pre-deployment approvals in the deployment pipeline.

Answer: A,C

Explanation:

Topic 1, Case Study: 20Overview

Existing Environment

This is a case study Case studies are not limed separately. You can use as much exam time at you would like to complete each case. However there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided m the case study Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of the case study, a review screen will appear. This screen allows you to review your answers and to mate changes before you move to the next section of the exam, After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements. If the case study has an All Information tab, note that the information displayed on identical to the Information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Requirements

Contoso plans to improve its IT development and operations processes implementing Azue DevOps principles.

Contoso has an Azure subscription and creates an Azure DevOPs organization.

The Azure DevOps organization includes:

- * The Docker extension
- * A deployment pool named Pool7 that contains 10 Azure virtual machines that run Windows Server 2016.

The Azure subscription contains an Azure Automation account.

Planned Changes

Contoso plans to create projects in Azure DevOps as shown in the following table.

Technical Requirements

Contoso identities the following technical requirements:

- * Implement build agents rot Project 1.
- * Whenever possible, use Azure resources
- * Avoid using deprecated technologies
- * Implement a code flow strategy for Project2 that will:
 - * Enable Team 2 to submit pull requests for Project2.
 - * Enable Team 2 to work independently on changes to a copy of Project?
 - * Ensure that any intermediary changes performed by Tram2 on a copy of Project2 will be subject to the same restrictions as the ones defied in the build policy of Project2.

- * Whenever possible. Implement automation and minimize administrative effort.
- * Implement Protect3, Project5, Project6, and Project7 based on the planned changes.
- * Implement Project4 and configure the project to push Docker images to Azure Container Registry.

NEW QUESTION: 2

A Solutions Architect is designing a customer order processing application that will likely have high usage spikes. What should the Architect do to ensure that customer orders are not lost before being written to an Amazon RDS database? (Choose two.)

- A. Allow TCP port 22
- B. Allow TCP port 23
- C. Allow TCP port 25
- D. Allow TCP port 161
- E. Allow TCP port 21
- F. Allow TCP port 3389

Answer: A,F

NEW QUESTION: 3

A Solutions Architect is designing a customer order processing application that will likely have high usage spikes. What should the Architect do to ensure that customer orders are not lost before being written to an Amazon RDS database? (Choose two.)

- A. Have the orders written into an Amazon SQS queue.
- B. Use Amazon CloudFront to deliver the application front end.
- C. Have a standby Amazon RDS instance in a separate Availability Zone.
- D. Use Elastic Load Balancing with a round-robin routing algorithm.
- E. Scale the number of processing nodes based on pending order volume.

Answer: B,D

NEW QUESTION: 4

With finite resources available within a cloud, even the largest cloud providers will at times need to determine which customers will receive additional resources first. What is the term associated with this determination?

- A. Scoring

- B. Prioritization
- C. Weighting
- D. Shares

Answer: D

Explanation:

Explanation

Shares are used within a cloud environment to prioritize resource allocation when customer requests exceed the available resources. Cloud providers utilize shares by assigning a priority score to each customer and allocating resources to those with the highest scores first. Scoring is a component of shares that determines the actual order in which to allocate resources. Neither weighting nor prioritization is the correct term in this case.
